

# Redrow 2018 Graduates need your help...

St Mary of the Angels Catholic Primary School in Aldridge is a small, suburban school with a large number of pupils. They rely on PTA and local support to help with their facilities, and with budgets tight some underused areas of the school grounds have become dated and overgrown.

Redrow, a FTSE 250 housebuilder with over 2000 employees, takes great pride in developing thriving communities, valuing people and building responsibly.

We're always keen to engage with local communities which is why we have been tasked with the mission of transforming an underused area of the school grounds into an outdoor welfare & educational space.

## Our Intention

Our aim is to transform a space that was once an outdoor classroom into an area that can be used as a tranquil and comfortable place for children to learn, relax and find serenity.

Our emphasis will be providing for students who, even at a young age, need help, support and facilities centred on positive mental health. Therefore, our goal is to regenerate this underused area into a breakout zone for children who may have behavioural difficulties, or simply need some alone time with a teacher. Part of this space will keep its original function as an outdoor classroom to be used when weather and circumstances permit.

## Our Plan

1 Formulate a full site layout. The school will then be consulted on the appropriate facilities and designs that are within our capabilities.

1

2 Interact with students to ensure that their ideas and suggestions can be feasibly attained and implemented.

2

3 Raise awareness of the project with both parents and Redrow's employees, contractors and external partners in order to secure donations, sponsorship and materials.

3

4 Complete the transformation between Monday 22nd and Friday 26th July in order to minimise classroom disruption.

4

## HERE'S HOW YOU CAN HELP...

We are to use our ingenuity, creativity and knowledge to complete this project on a £0 budget.

We're entirely reliant on donations, sponsorships and goodwill to make this transformation happen!

### Things we need:

- Plants and any garden items
- Trade vouchers
- Ground cover (bark / gravel)
- Tool / equipment usage
- Storage box / tinkering table
- Willow tunnel
- Any other donations would be welcome too!

If you think you can help us, please get in touch - details below.
